CONDITIONS OF SALES: Genesis Ag warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on the label when used in accordance with directions under normal use conditions. Crop injury, product use ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of seller. In no case shall Genesis Ag or its distributors be liable for consequential, special or indirect damages resulting from the use,

ZENERGY CAN HELP CROPS WITH

- Higher and better-quality yields
- Nitrogen fixation
- Soil pathogen defense
- Enhanced mineral availability

About Zenergy

Zenergy is designed as a crop microbial product. Once in the soil, microbes can colonize the roots and rhizosphere to fix atmospheric nitrogen and enhance mineral uptake. They also help solubilize otherwise tied up phosphorus and micronutrients to dramatically expand the reach and uptake of plant roots.
