

2022 Cotton Starter Program

Seed Treatment

Invigor 8 - 8.5 oz per 230,000 seeds - \$23.24 per unit/\$4.04 per acre

Designed to accelerate germination and seedling emergence

In-Furrow Pop-Up

Revita-N - 16 oz per acre - \$15.00

Carbose - 4 oz per acre - \$1.85

A pair of biological products designed to build your soil's existing microbial profile and the food source to sustain growth and longevity. The highest potential for a plant is the day the seed is placed in the ground.

Placement of Nitrogen 2x2

VitaNTerra+ - 32 oz per acre - \$7.00

Blend into starter fertilizer program. A blend of organic acids, including humic acid and fulvic acid, that are critical to your soil. When using phosphorus-based fertilizer in-furrow, the addition of VitaNTerra may soften any negative effects of phosphorus placed near the seed.

Early Foliar Application

Carbose - 4 oz per acre - \$1.85

Provides a food source for your native bacteria and fungi to assist the young seedlings.

VitaNTerra+ - 16 oz per acre - \$3.50

A blend of organic acids, including humic acid and fulvic acid. Spray water should be buffered to a ph. of 5.5-6 before adding the above components.

SilaKate - Application rate -12.8 oz. per acre. Cost per acre - \$15.00

A plant health benefactor.

Total - \$48.24 per acre
